ALLEGANY STATE PARK Art Roscoe Ski-Touring Area

This area was developed by the Office of Parks, Recreation and Historic Preservation, Allegany Region, and dedicated to Art Roscoe, a forefather of Western New York skiing.

CHRISTIAN HOLLOW - this 3.5 mile trail is suitable for experienced beginners. The trail follows reopened truck trails and old logging alignments which traverse the ridge overlooking Christian Hollow. A vista, providing a scenic view to the northeast, is located half-way along the trail.

LEONARD RUN - The 5.5 mile trail access a remote area of Allegany State Park using moderate grades and several relatively steep sections around the ridge overlooking Leonard Run. Suitable for the novice, but due to length, remoteness and one steep downhill section (if skied counterclockwise), makes the trail suitable for the intermediate skier.

PATTERSON TRAIL - The 3.3 mile trail connects the Summit Trail Head to the former Bova Ski Area, with parking provided at both areas. Gentle to moderate downhill grades over a former narrow gauge railroad bed make this trail very suitable for novice and intermediate skiers. While designated for ski-skating, the trail contains single track for traditional ski-touring.

RIDGE RUN TRAIL - The trail utilizes Ridge Run and Patterson Trails to create a 7.7 mile trail (if you start and finish at Bova, add 2 miles to the trail length). The grades are generally moderate with several short, relatively steep sections. Although the trail is usable by the novice skier, its length and difficulty over varied terrain makes it very suitable for the more experienced skier.

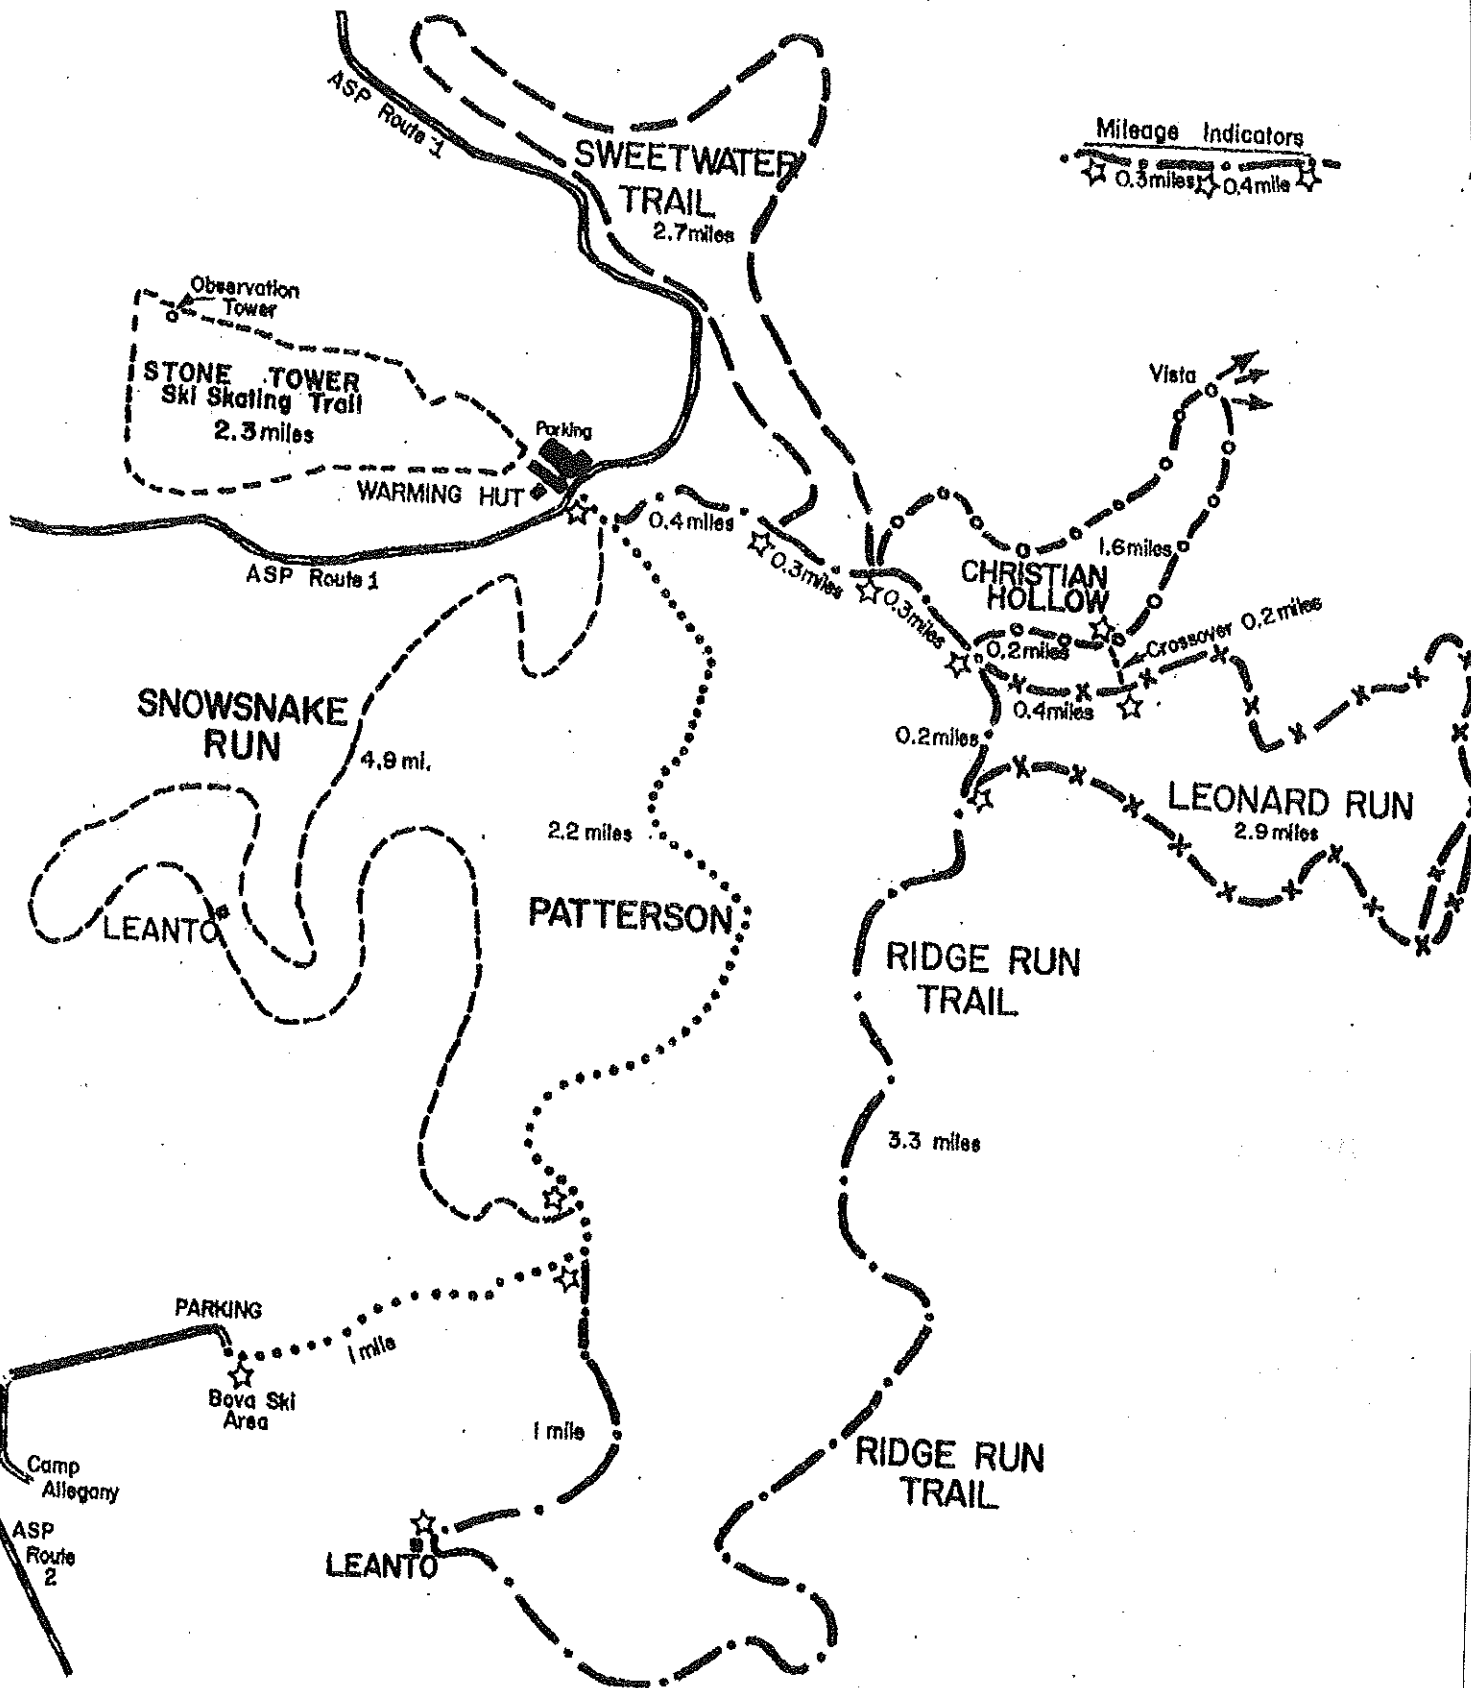

SWEETWATER TRAIL - This 3.8 mile trail is a good exercise trail for the skier with limited time or those who ski late in the day. Gentle slopes and long, flat traverses were developed for the less experienced skier.

SNOWSNAKE RUN - This 4.9 mile trail's long sustained grades and sharp corners makes it a physically challenging one for the ski-skating enthusiast. The trail is suitable for advanced skiers who utilize "V" type skiing technique (not suitable for the novice skier). The trail also has single track set for traditional skiers.

STONE TOWER TRAIL - This 2.3 mile trail was designed for the skiers who utilize the "V" type skiing technique. The trail also has single track set for traditional skiers.

Things to be aware of :

1. Dogs are prohibited on the ski-touring trails.
2. Sweetwater, Christian and Leonard Run Trails are generally in better condition early in the season and for spring skiing, due to their higher elevations.
3. Please follow marked trails - especially on trails that traverse remote areas.
4. Wear proper attire and plan your trips early in the day.
5. Ski-skating is allowed only on Stone Tower Trail, Patterson Trail and Snowsnake Run.
6. Ski-skating is prohibited on all other ski-touring trails.
